

ThinkLAB°: Decoding Intuition

ThinkLAB° is our disruptive way of activating our brains combining two other powerful organs: The Nose and The Eye.

We are decoding "Intuition" with the help of our olfactory and visual expertise, culture, curiosity and flair for "anticipative" thinking.

By extension, we explore cultural and lifestyle shifts with a point of view, together with charismatic thinkers and innovators from various fields of expertise such as Technology, Science and Philosophy.

This first "series" of Collages is a curated selection of contemporary artists, art events and exhibitions as well as social media imagery.

## Index
